

John P Dickerson

Curriculum Vitae

December 2017

Address: Department of Computer Science
University of Maryland
College Park, MD 20742.
Email: john@cs.umd.edu
WWW: jpdickerson.com
Phone: (240) 715-2514

Work Experience

2016–Present	U. of Maryland	Assistant Professor, Department of Computer Science & UMIACS
	<i>Affiliation</i>	Applied Math/Stats and Scientific Computation (AMSC) program
	<i>Affiliation</i>	Human-Computer Interaction Lab (HCIL)
2012–Present	Optimized Markets	Algorithms & optimization consultant
2010–Present	OPTN/UNOS	Algorithms consultant for national kidney exchange
2010–2016	CMU	Research Assistant, Electronic Marketplaces Lab
2008–2012	UMD	Researcher, Lab for Computational Cultural Dynamics (LCCD)
2005	IBM	Global Contract Preparation System (GCPS)
2003–2004	NSA	Bioinformatics and security R&D, <i>cleared TS/SCI</i>

Education

2016	Ph.D.	Carnegie Mellon University	Computer Science
2014	M.Sc.	Carnegie Mellon University	Computer Science
2008	B.Sc.	University of Maryland	Computer Science
2008	B.Sc.	University of Maryland	Mathematics

Areas of Expertise

Artificial intelligence, stochastic optimization, applied computational economics, market design, mechanism design, machine learning, kidney exchange, healthcare policy & information technology
I am especially interested in optimal decision making and optimization in healthcare and the social sciences.

Awards & Grants

2016–2018	Ministry of Defense (Israel) grant awarded for “Functional Targeting of Terror Networks: A Big Data Approach,” PI transfer from V.S. Subrahmanian	\$150,000	
2015–2017	Facebook Fellowship	Full tuition, fees, & stipend for 2 years	\$159,606
2015–2016	Siebel Scholarship	93 top students from leading graduate schools worldwide	\$35,000
2012–2015	NDSEG Fellowship	Full tuition, fees, & stipend for 3 years	\$218,410
2014	NSF SBIR Phase I	Principal Investigator, Award #1345567	\$150,000
2014	FutureMatch, our framework for dynamic matching, won HPCWire’s “Best Data-Intensive Application” award (joint with Pittsburgh Supercomputing Center)		
2014	“Price of Fairness in Kidney Exchange” ranked among best 10% of accepted papers at AAMAS		
2013	“Throwing Darts: Random Sampling Helps Tree Search when the Number of Short Certificates is Moderate” ranked among best 15% of accepted papers at SoCS		
Ongoing	Travel Funds	AAAI, AAMAS, SoCS, CMU	\$3,860

Selected Projects

2010+: Kidney Exchange

Kidney exchange is a type of barter exchange, and presents many interesting problems in optimization and mechanism design. I am particularly interested in bridging the gap between kidney exchange theory and practice, with an emphasis on *dynamic* kidney exchange, where the matching algorithm must take into account possible futures when matching in the now. I developed a framework that automatically strikes a balance between equitable and efficient matching in a dynamic model (while necessarily keeping human policymakers “in the loop”). I have also shown that incorporating the possibility of post-algorithmic match failures into the optimization problem itself both

increases the number of transplants in expectation and makes the clearing problem—implemented via a custom branch-and-price integer program solver—easier to solve. I am currently exploring the effect on global welfare and participants' incentives of multiple competing exchanges in a dynamic model, as well as multi-organ exchange. I work with a variety of fielded kidney exchanges in the United States and internationally.

Media Coverage: The first nationwide kidney exchange took place in Nov. 2010, and was covered by the *International Business Times*. See the CMU press releases in [November](#) and [December](#). Future-Match, our data-driven framework that learns to match in dynamic environments, won HPCWire's 2014 Award for Best Data-Intensive Application (joint with the Pittsburgh Supercomputing Center; we tied with IBM Watson). The announcement is available [here](#), with a CMU press release [here](#).

2011+: Dynamic Clearing & Automated Abstraction in TV Advertising

Can we use automated abstraction to deal with channel explosion in online and television advertising markets? In the case where bidders bid asynchronously and bids (possibly in the form of complex campaigns) can be accepted or rejected in an online fashion, can we tractably look to the future to yield better expected revenue for the seller or fairness for the bidder(s)? I'm exploring trade-offs between optimality and tractability in the context of dynamic market clearing of campaigns and abstraction of concrete channels.

Toward this end, I'm building an optimization engine and cloud-based combinatorial market system for selling television advertising campaigns. Our system is in the proof-of-concept stage with one of the world's largest cable operators (MSOs). The technology applies to cable operators (MSOs), broadcast networks, cable networks, TV over Internet, and cross-media advertising.

This research is being performed in part with Optimized Markets, Inc.

2007+: National Security & Counterterrorism

Science, *Scientific American*, *The Register*, *R&D Magazine*, and many others covered my work on how virtual worlds can be used to help policy and defense analysts. See my paper in *Science* ([link](#)), my interview in *Scientific American* ([link](#)), or coverage in the satirical magazine *The Register* ([link](#)). My more recent work in this area uses data mining and machine learning techniques to predict group behavior, with an extensive case study focusing on Lashkar-e-Taiba, a well-known South Asian terror group responsible for (among other attacks) the 2008 bombings in Mumbai.

Relevant Publications: [[5](#), [19](#), [25](#), [28](#), [34](#), [39](#), [47](#), [54](#), [55](#), [56](#), [57](#)]

2009–2012: IED Cache Detection

The Spatial-Cultural Abductive Reasoning Engine (SCARE) is a project I helped develop that analyzes patterns of improvised explosive device (IED) attacks in a war zone. The final product was tested in Afghanistan and deployed elsewhere.

Media Coverage *Nature*, *Popular Science*, *The Baltimore Sun*, and many others covered SCARE. See the articles in *Popular Science* ([link](#)) and *The Baltimore Sun* ([link](#)). The *Nature* article is [here](#).

Relevant Publications: [[38](#), [58](#)]

Advising & Mentorship

Ph.D. Students

- Duncan McElfresh (Mathematics, 2017–)
- Candice Schumann (Computer Science, 2017–)
- Neal Gupta (Computer Science, 2017–)

Undergraduate Students

- Samsara Counts (GWU, 2017–, UMD Summer REU): deep reinforcement learning for matching markets

- Cameron Moy (UMD, 2017–, UMD Summer REU): deep reinforcement learning for matching markets
- Linyi Xi (Haverford, 2017–, UMD Summer REU): deep reinforcement learning for matching markets
- Ayman Karim (UMD, 2016–): using sentiment and social network analysis to predict winners in WWE matches
- Aditya Mithas (UMD, 2016–): deep reinforcement learning for matching markets
- Kevin Schechter (UMD, 2016–): prediction markets
- Benjamin Plaut (CMU, 2015–2016, next position: Stanford Computer Science Ph.D. program): combinatorial optimization and kidney exchange

High School Students

- Naveen Durvasula (Montgomery Blair, 2016–, co-advised with Aravind Srinivasan): mechanism design and Bayesian optimization for kidney exchange. Naveen was an Intel International Science and Engineering Fair (ISEF) Finalist in 2017, and won the Ashtavadhani Vidwan Ambati Subbaraya Chetty Foundation Second Award at Intel ISEF in 2017.

Thesis Proposal & Defense Committees

- Yulu Wang (UMD, defended in 2017), next position:
- Andrew Ruef (UMD, proposed in 2017)
- Pan Xu (UMD, proposed in 2017)
- Eric Krokos (UMD, proposed in 2017)
- Zhuoshu Li (WashU, proposed in 2017)
- Srijan Kumar (UMD, defended in 2017, next position: post-doc at Stanford Computer Science)

University Service

AY2017–Present	UMD	Faculty board member, ML@UMD
AY2016–Present	UMD	Artificial Intelligence Field Committee
AY2016–Present	UMD	High School Student Matching & Placement Committee
AY2017–18	UMD	Faculty Hiring Committee
AY2017–18	UMD	Teaching Awards Committee
AY2016–17, 17–18	UMD	PhD Admissions Committee
2017	UMD	Judge, Daemon Dash Hackathon
AY2012–13, 13–14	CMU	Admissions Committee
2012	CMU	Visit Weekend planning committee
2012	CMU	President of Dec/5 (SCS graduate student organization)
2011, 2012	CMU	Artificial Intelligence Reading Group (AIRG) planning

Programming & Technology**Languages – Fluent**

Java, Python, C++

Languages – Experienced

Ruby, C, JavaScript, Matlab, L^AT_EX₂e, ActionScript, Flex, HTML4+, CSS2+, XML, HAML, YAML, JSON

Frameworks

Sinatra, Flask, Rails, Play, Java EE (Servlets on Tomcat or GlassFish), Git, SVN, CVS, TORQUE, MPI
I've also extensively used Blacklight, a 4096-core NUMA supercomputer at the Pittsburgh Supercomputing Center, as well as a 1404-core, 116-node cluster at UMD, a 21-node Nvidia Tesla cluster at UMD, and a variety of Amazon AWS services through my work at Optimized Markets and Kidney Match.

Environments & Software Suites

Emacs, Eclipse, NetBeans, Visual Studio, 3d Studio Max, Adobe Creative Suite, Gimp, RubyMine
